

FOR SALE

GREAT LAKES LOG CRAFTERS ASSOCIATION (GLLCA) EDUCATIONAL WORKSHOP 24' x 26' LOG SHELL

The GLLCA had an educational workshop/fundraiser in May in Seeley, Wisconsin. The volunteers constructed a 24'x26' hand-scribed log shell with a loft. The logs are approximately 12" to 14" butts with 8" tips and kiln dried. The loft is approximately 1/2 of the buildings length with log loft joists going across the building. There is one ridge pole included but not set up on the building.

At this point, there is only one door cut into the log shell. This will maintain flexibility for the buyer as to window and door positioning.

The building will be sold "AS IS" in the building yard of The Natural Log Homes in Seeley, Wisconsin. The buyer will be responsible for removing the log shell from The Natural Log Homes' building yard. This log shell could be loaded on to and stored on a 40' flatbed trailer to give buyer time to prepare their site or off loaded at their site and covered with tarps to store for an extended period of time.

Payment arrangements will be to have payment in full before removal of log shell. Cash or Cashier's Check acceptable.

For more information, please contact, Donovan Dums, GLLCA President at 802-989-8163 or Kay Sellman, GLLCA Business Manager at 612-590-7133 or e-mail info@gllca.org.
